

Mike
Trivedi

SENIOR SOFTWARE DEVELOPER

trivediahd@outlook.com

Brandon, Florida

ABOUT ME

I am a Senior Developer with extensive industry experience since 1991, mostly as a Lead/Principal level programmer.

The variety and extent of my industry experience has ensured that I have always been current with the highest business standards and a wide wealth of technology stacks. I have worked with some of the top IT teams in the country and have benefited from the exposure.

SKILLS

15+ years

Lotus Notes / Domino

15+ years

Java / JVM / JavaScript

20+ years

Windows Programing

15+ years

F# / DotNet / VB

20+ years

Database Technologies

EDUCATION

BS (Statistics/Mathematics)

Gujarat University, India

MS (Journalism)

Temple University, Philadelphia

IBM Principal Application Developer:

Lotus Notes/Domino

Over seven certifications for various versions

EXPERIENCE

Senior Software Consultant

My contracting clients (mostly in the Philadelphia area, but also in Chicago, Nevada and Florida) have included the following:

Pharmaceutical	Financial	Media	Other
Merck & Co.	Fannie Mae	Comcast	US Dept of Energy
Glaxo SmithKline	Chase Manhattan	MLB	ARCO
	Discover	ISI (Thomson Reuters)	Elf Atochem
	Vanguard Financial		Temple Univ.
	Reliance Insurance		

In Depth

Besides working at contract positions, I have owned my own business, an IBM Business Partner, since 1994. I have developed and sold software in the US and Europe. Since the past six years I have been developing a Database Software Product in F#.

In most of my consulting jobs I have worked at a Senior Level, including overseeing teams and/or reporting directly to Senior Management.

The wealth of my experience has exposed me to in-depth hands-on knowledge and experience which my clients have always valued: I have extended the JDK and written my own modules in JavaScript, F# and more; as well as pushed or pulled data from data warehouses and sources as diverse as SAS/SPSS/JD Edwards/DB2/Oracle and more.

I also have much experience using fairly esoteric technology in the workplace, such as UnixC/Perl/sed/awk which my clients have always appreciated.

Since using F#, I now consider myself a Functional Programming enthusiast.

I am a US citizen and have worked on a contract for the US Department of Energy which required a Security Clearance (probably no longer active).

www.linkedin.com/in/miketriv 

Mike's LinkedIn page is **not current**; it was hacked in 2016 and has not been updated since.

From March 2016 until Sept 2023, Mike has been **CTO** at a privately held **NoCode NoSQL DBaaS** startup.

The diagram below should serve to give you an overview what he has been working on during these years. Mike will be happy to elaborate on any details of interest.

Some of the technologies used in this project include **MongoDB** and **F#** ports of the popular **Haskell** FP libraries (Parsec, QuickCheck etc.)

Work for the startup continues in piecemeal but is likely to be held up for the foreseeable future pending Venture Capital infusion.
